*Anthony Novak, M.D.*  
183 East Pomeroy Street  
River Falls, WI 54022  
715-425-0115

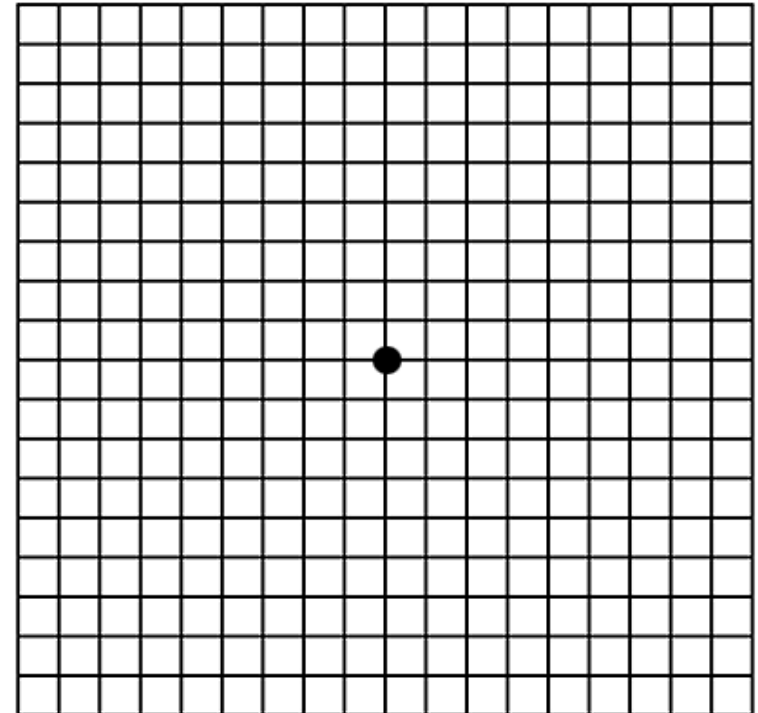

The Amsler grid test can help reveal signs of wet (the bad form of) macular degeneration. Check the test each Sunday evening.

This is how to check your vision using the grid on the reverse side of this card:

1. Sit or stand in an area with good lighting and look at the chart at your normal reading distance. Many people hang it on the refrigerator.
2. Look at the center point (through your Bi-focals).
3. Cover one eye completely.
4. \*Look at the central dot on the grid.
5. Repeat the test with other eye.

\*If any of the lines in the grid become twisted, curved or missing make an appointment this week or the following week to see Dr. Novak.

**For appointments call 715-425-0115**

Note: Test one eye at a time.
